## Professional Summary

Web developer with solid experience in front-end and back-end projects, especially in agile and fast-paced environments. Proactive, with strong problem-solving skills and excellent communication. Proven experience in freelance projects and remote work, focusing on value delivery and continuous improvement of digital products.

## Professional Experience

Dinheirow (Campos dos Goytacazes, RJ - Remote) - [07/09/2024] to [Present]

- Mid-Level Frontend Developer

At Dinheirow, I work on maintaining and evolving the onboarding system and backoffice. I also develop new features to enhance user experience within the system. I utilize modern technologies such as React, Next.js, Vue, TailwindCSS, Shadcn/UI, React Query, and Zustand to create dynamic and efficient interfaces. I work in an agile team using Scrum, delivering continuous improvements and contributing to front-end architecture decisions. I have experience with automated testing, using Cypress and Playwright for end-to-end tests, as well as Jest for unit and integration testing, ensuring quality and reliability in deliveries.

Instituto Federal Fluminense (Campos dos Goytacazes, RJ - On-site) - [01/10/2023] to [12/31/2023]

- Network Scholarship Holder

I worked on documenting network infrastructure using Netbox, promoting greater traceability, configuring network equipment (switches, routers, printers) and managing VLANs, improving network security and performance by ~30%. I organized structured cabling, reducing connection failures and facilitating maintenance.

Freelance (Campos dos Goytacazes, RJ - Remote) - [2019] to [2023]

- Web Development

I worked as a freelance web developer, focused on projects creating platforms for lead generation. Using WordPress, I delivered customized solutions for businesses, ensuring responsive layouts, attractive design, and conversion-oriented functionality, resulting in an average 25% increase in client conversion rates. I was responsible for the entire lifecycle of each project: briefing, wireframing, development, and deployment. In addition to front-end, I also had occasional experiences with backend development, creating APIs and integrating databases. I used technologies such as Node.js, Express, Sequelize, NestJS, MySQL, PostgreSQL, and Prisma, offering complete solutions when necessary.

## Education

Instituto Federal Fluminense (Campos dos Goytacazes, RJ) – [2022-2026]
